Personally I'd like to see a C&C Renegade 2 (option one). I thought the information/screenshots/art released by Westwood after Renegade 2's cancellation was superb, and could have acted as a great wrap-up of the C&C storyline and answer some questions and plot holes within the C&C story.

That and C&C mode would really attract me to the game. There were also a lot of other cool modes Westwood talked about a couple years ago.
