Distrbd21 wrote on Tue, 07 October 2008 04:38how can i install the code more than once?

i have been trying but all i get is the frist words say plase try again and the last one works. Should just have to copy/paste, then edit a bit. There's no "installation" of code, just updating/changing.

I don't know any reason why you'd be getting the "Please try again." response unless you forgot to update the correct_spell variable.
