Very nice.

What I wonder is did you write the PHP code that's behind it?
Where is the info saved in a MySQL or SQL DB?
So in short I am intrested in the working behind it. And not the functionality on what you can do with it because I prefer the technical stuff.

2 other things.

1. beneath the page it says copyright 2007 should this not be 2008?
2. Your company once had a 1 year free domain.nl offer is this offer still available?

Thanks
