15:14Sorry for the bump but whats the difference between the 5e Network Patch Cable and the 5e Network Crossover Cable?.

<http://www.cat-5-cable-company.com/faq-difference-between-patch-crossover.html>

Yes im fucking stupid which one is for connecting for connecting modem to router then from router to a pc? the patch cable?

Yes, you use the patch cable.

The crossover cable is used usually for connecting 2 computers.

If I have a large amount of data to move from one computer to another, I would use a crossover cable, assign IP's, configure sharing, and start copying/moving files directly into the other computer.

Well we do use file sharing and i do assign ips manuel into the lvp4 settings and I do copy large files sometimes from one pc to other...inc remote desktop using REAL VNC
