b/c i started making c-130 mods only b/c of taximes programs. I was making more advanced drop mods and i whanted to see if he would ike to use them in his C-130 Drop Modifier. Also, he probly would beable to make requests i can do (more advanced drop mods), and help him out with his program. scence ive never been able to contact him via 2 E-mails, i have given up, and made my own installer. When i was looking through the avitars l8ly, i saw his name on them, and thought about asking here.

=samous

NOTE: i also REALLY admire some of the thing he has done.
