i am laughing my head off at you but no offence but i dont think you under stude that.

number 1 is where your at 2 is a small and 3 is twice as larg but twice as far away. so then number 3 is half the size and seems the same size.

the dimentiones for this are the first shere (teal, dosent mater) ) is 30 meters diamiter the second shere (blue) is 10 meters diamiter and is 150 meters from the first shere, the thierd shere (red) is 20 meters in diamiter and is 300 meters from the first shere
