PS: you need all the textures in the same folder

You cookies are at risk.
it didnt worked?

Im getting very confused, I tried almost everything, and the file still doesn't load the textures. I had the .w3d veiwer program open, RenegadeEx browsing the always.data file, and the folder for the background.w3d file and all its textures it doesn't load them can you must upload a file with the textures in it.
