cheesesoda wrote on Tue, 28 October 2008 07:43Dude, how do you not know how to search for things? A fucking first grader could conceivably whip your ass.

I have a tutorial that uses two programs to rip a DVD. It even has a link to both programs. I've used this tutorial for numerous rips (as I usually forget how to use the program after not ripping for months at a time).

<http://elliottback.com/wp/how-to-rip-a-dvd-a-tutorial/>

And like I said everything I found on google has been cheap, shareware, or spyware and none cant let me choose my own output size
