This is a great way for people to keep other people from wasting their time going to bogus websites that serve no other purpose other than to sell you something. Everyone should write a review about a website that they found to be misleading or bogus. They should also report it to the BBB in that particular city it is in. This helps clear the information highway from misleading and dangerous advertising predators. Praying on peoples hopes and needs is a dark practice. This is what I found to be the case of a website called ProcessingEmails.Net. I have reported them. They are currently being reviewed for further information. If anyone can clarify this for me and change my opinion, please message me. Magic Dragon
