well star craft dint die that quickly it actully lasted very long (the servers are still up) and people still play it and billized just sets out a patch every week that keeps people from useing trainers and cheats online but people find a way to use them.
the easyest way to make an online game with no cheats it to have no cheats to beggin with, hopefully star craft ghost will have cheats so it dies quick and renegade lives!

(i think i sound crazy hmm oh well)
