Why happens when you shoot your buidling whit a chemsprayer?

I had a prob like that, it was whit the pistol, I found a box named EJECT, I needed to delete and export it.

Just redoing the chemsprayer would be necessary I think, then I wonder, where is the it that makes it crash in the chemsprayer, since it only happens when you shoot your own buildings, shooting on the ground is fine

U mean u need the "eject" bone removed form the chem sprayer?

I don't know how WW made ore coded it, that is my problem, some weapons appear to call up some things

(I think EJECT is used for the bullets coming out the pistol when you shoot it)
