Hi,
I have had "Command and Conquer: The First Decade" for about 1.5 years now, I was using Windows XP on my computer. Then, I stopped playing for about half a year, and in that time I have upgraded my computer to Windows Vista Ultimate SP1. My computer is a gaming machine and the graphics card is about £500, so I don't think there is any problem there! Now, my problem is that when I start up TFD and click Renegade, everything is normal, but then I get this message:

Ok, I understand that my Username is wrong, but how do I make it so that I can make a new account?

Thank you so much in advance,
Tim
