Hi,

I would like to make a radio in LE, when I poke the radio I want to hear music from it. But when I poke again, the music must stop. When I poke it I want to hear a "click" sound. The more you go away from the radio the lower the volume of the music. I already have my own music for it and my own "click" sound. I also have a pokeable radio, I only have to get these in the right place. Anyone who knows to get this functioning?

Kind regards,

Brian
