how

it was actually 0 to turn it on and 1 to turn it off for the user name the picture you just have to rename a folder and a file

HKEY_CURRENT_USER \ Software \ Microsoft\ Windows \ CurrentVersion \ Policies \ Explorer

folder for the image and folder

C:\Documents and Settings\All Users\Application Data\Microsoft\User Account Pictures

Look at image i uploaded

(might have to restart)
Yes that is the other way but i was trying not to mess people up in the register some people might mess it up.

Thank you for adding that.

snip where u doing the alt 0160 on the right number pad?
if you have a laptop you have to turn it on using the FN button.
