luv2pb wrote on Thu, 20 November 2008 15:21My understanding of SSD is that the hard drive spins at full speed/power 100% of the time. Given that, it is fail for laptops because a battery issues. I have heard it is very fast and pretty stable for new technology though.

The new port S.A.T.A. all the way it is much better and faster than the original I.D.E. which is just slow.
