Subject: What is a good service
Posted by renalpha on Fri, 28 Nov 2008 21:06:17 GMT

Since i planned to start a webhosting company KVK certified.
I wonder, what do you think what is a good service?

Server specs:
Intel xeon quad core.
16GB ram Kingston
32 X 16 SSD drives
1GB uplink connection

I have a directadmin lifetime license.

What would you like to see? what are good euro prices?
What is a good customer service.
Share it with me.

What would you move to me as a ISP?

Lets forget me as a caracter and move in a business partner.
Since im a proffesional worker @ the hosting company where i work now, i know what is possible what can be done etc.

Just some opinions, what should my company do better then the currents ones.
