MasterShakeif so, how can i get on it?

I think he asks about built-in-game voice chat, not TS

NS3Deltateam speak ..... is what some peeps use .. but its to complicated form e... to many numbers

I used to think so, but when I've downloaded it, I've simply configured it and now it's very helpful for our clan.

CrimsonTeamSpeak Regulator is coming soon which will allow a TeamSpeak server to run alongside a Renegade server and automatically sort players into team-specific channels.

Soon? Tell me about it.
