oops I meant Resurrection, not revelation. Got it mixed up with EVE Online. Whatever that other build was with the green broken glass/whatever background. I'm at work at the moment & its not installed on this comp. I love C&C:R online so much, every time I couldnt find my serial number, I went out & bought another copy. I must have 12 serial numbers

I'll try that numpad thing when I get home. I thought I'd tried that before. Thanks!!!

But yeah just yesterday I kept being sniped by people I'd thought were teammates because I usually look at their names and not the avatar. Red-named Havoks headshooting me over and over, haha, and yellow-colored chat from teammates while I'm NOD. Very confusing!
