If someone's seen fit to whack our cosmic reset button, so much the better. We need a good dose of imminent doom to rid us of this superiority complex we've developed over the past few tens of thousands of years.

On the other hand, it isn't going to happen because this whole "OMFGWTFBBQ2012" shit-heap is just another idiotic conspiracy/doomsday theory. All this means is that, when the real threat comes at us from another direction, we're all gonna die because some stupid fuck decided that the ancient Mayans could predict the future. Can't wait to see it happen, really. I'll be laughing my ass off while everyone else is running around in circles screaming for mercy from above.
