Subject: What role does a Sniper have, in a world full of Tanks?

i played the engineer, and it was pretty damn fun, even thought i really had no type of offense...i had my hands full repairing buildings and tanks, and healing people.

which class gets all the proximity mines? i see fields of tons and tons of mines around the levels, and I have no clue which class drops them. i always only have 2 mines at any given time

i think i may pursue a career as an Engineer/Demolition guy.
