Here's the code for the reload bar!!!

```
if (state == WeaponClass::WS_RELOADING){
    barx = (float)draw.Draw_Single_Line(D3DCOLOR_XRGB(255,255,0), 0, 0, L"Charging... ");
    barx *= draw.GetScalar();
    DrawChargeBar(barx, 0.003f, 0.02f, 0.004f, 1.0f-(1.0f/reloadtime*statetime),
D3DCOLOR_XRGB(255,255,0), D3DCOLOR_XRGB(255,255,0), D3DCOLOR_XRGB(0,0,0));
} else if (maxammo == 0 && _ammo == 0)
    draw.Draw_Single_Line(D3DCOLOR_XRGB(255,0,0), 0, 0, L"Battery depleted.");
else
    draw.Draw_Single_Line(D3DCOLOR_XRGB(0,255,0), 0, 0, L"Charged.");
```

```
if (g_pPICBatch->Serialize())
    g_pPICBatch->Render();
```
