Subject: Specifications dedicated server
Posted by Requator on Fri, 07 Mar 2003 16:35:54 GMT

I am considering to rent a dedicated server. Can someone advise me what what kind of server i have to rent when i wanna have a 40 player dedicated server? I need the specifications for the server and some advise about the amount of data traffic that the server will occur.
Greetings, someone who is tired of seeing only servers with less than 40 players and laggy servers.
