npsmith82This is exactly the kinda feature that needs to be present in every fan-made map from now onwards (or at very least, just yours).

I'll be using them wherever I can, as well as making improvements on them from time to time. I plan to release the models so other map makers can use them too, but I still have to write the instructions. That'll take a little while to do, I'm rather slow at typing.
