Subject: You guys got any 'Support Character' tips?

Which classes are considered support? I know the engineers and hotwire/technician, but are there any others?

and think some of you guys could share some tactics for these support classes? I am still on the hunt for a class to play (i don't like switching around all the time...i like to pick one class and try to stick with it as much as possible).

and btw, just a random question..

wtf is a 'Harvey'?
