DeathLink6.0 wrote on Tue, 23 December 2008 15:23 This HUD supports every screen resolution but maybe if you use a too small resolution some boxes will overleap.

This screen-resolution independence was not made by us! It can already be made with a pure 3.4.4. shaders.dll

@To all with crashes: Sry I have no idea. I'm programming nub.

it does not support resolutions under 1024 x 768 also there is an small problem if you have an hp over the standard
