Here's something you might find fun for a quick LAN match against some friends, it's kind of boring alone though.

4 different types of Samus characters to use:

Balaced, has basic beam

Heavy, beam fires 4x as slow but does 4x damage, ideal for a quick snipe

Fast, runs superfast and has a light beam

Cloaked, has a cloaking effect and a light beam

All beams have sniping abilities, only heavy's is really effective IMO.
