hayes321srry i have been in NY on vacation for a while and now i am at my grandma's house on her crappy dial-up. Ok here is what i did

- 1) killed the refinery on GDIs side so that the harvy wouldnt mess it up
- 2) bought vehicles on Nod and drove them to the GDI base
- 3)switched teams
- 4)put the vehicles in a line
- 5)switched back so i couldbuy a specific vehicle
- 6) got on top of the vehicles and walked to a place i knew i could get up
- 7) walked up the low spot and up to the volcano
- 8)slipped off
- 9)walked the vehicles again and then i got up to the volcano

There the secret is out if you can find the right place to do it.

See, you're just shooting yourself in the foot, because in your pictures, the GDI refinery is very much operative.

And, there's a zero NOD score...
