Chuck Norris wrote on Thu, 01 January 2009 17:07 You have to remember that the MRLS and Artillery aren't meant to be used the same way. The MRLS is more of a support vehicle, whereas the Artillery can be used on it's own

not always true, who says that this is its reason, u said the mrl is a support vech? just cause it is> but lets say an error or glitch or flaw in design made it into that when it would not have been?

what I mena is u can lable a type of vech unless we sure thats what it was made for if lets say mrl was meant to move the turret then the idea o it being a support vech would change
