heh i found UT3 for PC one day for 9\$ and the first thought that came to me is I can get this now, and when i can, play Renegade-X with it. So i bought the game. I still have not seen the game as cheap as that so its not like i got ripped off. The game is still in its packaging since my PC is unable to play it. It'll probably be opened once i build a new system in a few months + renegade x comes out
