"omg wtf bbq send it in a PM"

"omg post it in mod forum already!!! n00b!"

Seriously:

Given the size limit, I would have thought an off site link (somewhere like game-maps.net) would be appropriate. For things like RP2, whose mod is really large, they've got their own homepage.

I think cheats is anything you'd get banned for from all servers... *you know what* , Bigheads, wall hacks etc...

A precise definition of what is considered a cheat is pretty tricky to come up with.
