Darkknight wrote on Tue, 13 January 2009 06:54 what the hell are you talking about??? the waterfall is awesome looking and the river down below with the splashing water against the rocks is just fantastic, along with the tib effects. The detail on this map is far better than any ren map I've ever seen. If you've seen better please tell me the map cause I've seen them all.

Only thing I see about it is the OB range could be longer but I'm going to use the map as is and run it on Unrules and Renbattle.net servers.

Only way to really test this is with a server full of people.

But either way the guy did a fantastic job on this. Best Ren map I ever seen.
I'm saying it could look better, it looks lower grade in comparison to the rest of the map.
