what amazing plot were you looking for? they did what they said they were going to do; they made a game more like real life based on shit that actually exists in a world much like the one we live in now with shit that could actually happen

you're all butthurt that there wasn't a supir awsom space meteorite summoned by a bald dude actually sent here by aliens so he can bring forth a secret underground society to try and take over the free world

i didn't give a shit either way, generals plays quite well and that's what matters to me

and red alert 3 is pretty solid, i was skeptical as fuck but it feels a lot like ra2
