I used to prefer the Ecksbawks, but now I've decided I like the PS3 better. Why? I can prove that every one of my friends who has a 360 has had to return it to get it repaired at some point in its life. The multiplayer costs money, and the new dashboard is a bit rubbish.

PS3s however, while a bit chunky and heavy, don't have any major hardware problems (yet...) and the multiplayer is completely free, the way it should be.
