Ghostshaw wrote on Wed, 21 January 2009 03:59 You probably receive the page jsut before the eviction, but the eviction comes so quickly after it that you don't ahve the time to see the message so it goes to the background and won't go away till you join the next server.

That sounds like it's the server's fault. Why the hell would the server *PAGE* the player? unless they're thinking it would be delivered after they've been 'evicted'...but if they want that to happen, make it on a timer...then page. OR, use pamsg!
