Urgent! Pathfind Blockers - Problem

How I have to set the Pathfindblockers, so that there is an effect?

I made a large blocker in RenX and set it up in LE as a pathfind blocker.

But there is no difference?!?! LE wants to calculate about 29,000,000 Boxen with and without them (what cause "Out of Memory" in XP).

I can make the blocked area bigger, so that the tiberium field would be included.

Its a flying map with HIGH and DEEP (naval map).
