I'm wanting to start a websites geared towards FPS games. I want to setup a bunch of servers but I kind of need someone to help me manage them. The website will be www.AlwaysFPS.com, still looking for a skin but I would like to setup the servers first.

Here are the games I would like to setup servers for and need admins for:

Unreal Tournament 3
COD 5 and possibly 4
Crysis Wars
Frontlines: Fuel of War (already have 2 up)
And anymore you can think of

If you are interested in being a head admin for some of the gameservers let me know. You'll be a mod on the website forums as well. Just need to get the gameservers up first so it people will come and register.

PM me if you are interested.
