I don't really know much about SQL yet, here is a screenshot of when I got to my control panel and then click MySQL.

Then I created MySQL User

Then I got this screen. But I honestly don't know what to put there

The screenshot shows the phpMyAdmin interface. On the left is a sidebar with the phpMyAdmin logo and navigation icons. The main area displays the server and database information: "Server: localhost" and "Database: a6661448_Di3Hard". A menu bar contains "Structure", "SQL", "Search", "Query", "Export", "Import", and "Operations". Below the menu, it states "No tables found in database." A dialog box titled "Create new table on database a6661448_Di3Hard" is open, with "Name:" set to "counter" and "Number of fields:" set to an empty box. A "Go" button is at the bottom right of the dialog. Below the dialog is a link: "Open new phpMyAdmin window".
