I found a good .PHP tool for the download counting now tho Also GrimmNL helped me a explaining stuff, thank you.

But I am the only one that can see it, because if you want to view it you have to enter a password ^

I just want it displayed on my website like it does here, and gamemaps. Only it seems impossible since I can't find it anywhere on GOOGLE

Here you see the screenshot, when I give more files a downloadcounter there will be just 1 list, which is also cool ofcourse, but that might be the best I could get
