Aucun wrote on Thu, 29 January 2009 11:21 Opened cmd and typed
E:\Westwood\RenegadeFDS\Server\BRenBot\brenbot.exe then hit enter

I got nothing at all no errors no anything

Look, if you don't follow these next steps **exactly** then you are not going to get any useful information out of BRenBot. You may **not** consolidate any steps nor may you skip any.

Open a new console window (Start->Run->cmd)

Type "e:" into the console window and press enter.

Type "cd e:\Westwood\RenegadeFDS\Server\BRenBot\" into the console window and press enter.

Type "brenbot.exe" into the console window and press enter.
