1.1) service list

2.1) try to uncheck it to change it back since its work before

5.1) should be adobe updater

also go to services list

(Control panel > Administrative Tools > Services)

Look for anything with the word license in it and right click and start it

do the same with ANY adobe programs or servcies

so lets say one said " adobe photoshop service" make sure its running right click and hit start
