Hey

I've been trying to attach a script to beacons inside a plugin. It simply just doesn't work..

```
void ObjectHookCall(void *data,GameObject *obj) {  
if (Is_Soldier(obj)) {  
    Console_Input("msg LOL HI IM A SOLDIER");  
}  
else if (Is_Vehicle(obj)) {  
    Console_Input("msg LOL HI IM A VEHICLE");  
}  
else if (Is_Cinematic(obj)) {  
    Console_Input("msg LOL HI IM A CINEMATIC");  
}  
else if (Is_Powerup(obj)) {  
    Console_Input("msg LOL HI IM A POWERUP");  
}  
else if (Is_C4(obj)) {  
    Console_Input("msg LOL HI IM A C4");  
}  
else if (Is_Beacon(obj)) {  
    Console_Input("msg LOL HI IM A BEACON");  
}  
}
```

All of that works except for beacons. Anyone know why or have a workaround/solution?

Thanks.
