YazooGang wrote on Mon, 02 February 2009 17:52Ok, instead of reinstalling the whole program do this:

1. goto customize at the top
2. Click Customize User Interface
3. Click the keyboard tab on the windows that will pop up.
4. Then click Reset at the bottom.

I think that might help

this didnt worked for me.

reinstalling renx takes some seconds.

and, if you dont have a very indivially configuration, it isnt a problem.

the only thing a had to do after that is configure the shortcut for the w3d-importer again.
