Zuess wrote on Sun, 08 February 2009 15:37If people catch on to this, can even write a wrapper around renegade exe and have it auto-check for new maps and versions of maps and download in background throttled while you play

This is just a pre-mature release of TT so-to-speak. TT has planned on doing an auto-map downloader built-in to the game. What this does is simply downloads the maps you want and extracts them. :/

Also, we're going to be setting up two other mirrors of the maps so it's not 100% dependent on St0rm's Website.
