Do it! just buy an external hard drive they're cheap enough(\$70 for 160GB around here), if you're cheap and don't have much you need backed up you can get a 16GB Thumb drive for \$20.

Remember when backing up you need more than one backup location at least 2 on-site and 1 off-site(Windows Live Skydrive for example works pretty well you get 25GB to store stuff on the only problem is the upload limit is 50MB)
