I'm on a 2.5Mbps Qwest VDSL line here. It's the fastest we can get until we move somewhere else. 2.5Mbps just kills me when I need 20Mbps!

Computer Specs
Core2Quad 6600 (2.4Ghz)
4GB 1333MHZ Ram
2x500GB Raid 1
1x750GB Media
9600gtx video

This current system isn't really cutting it for me. I have a lot of programs open and need to get a lot done on a daily basis. My next system will probably be this:

Newer Core2Quad's. Perhaps an Extreme
8GB Of Ram
2x300GB SCSI Raid 1 - (Work Related, and maybe some high density games)
2x1.5TB 7200RPM std HD's - For media and games
1 or 2 1GB video cards. I think I don't need 2 video cards since I'm not a graphic artist like some of you.
