Hi.

I'd like to optimize my renegade gameplay by changing my Aim icon and potentially some other stuff.

However, I got this Winrar with Renegade Addons and skins from Filefront (see screenshot) but I don't know how I make these files work. There was no explanation with the winrar, only a notepad saying it's downloaded from www.jelly-games.net/.

Anyway when I want to download skins from jelly I can't reach the skins or I'm too stupid, not sure . Any help?

Thanks.
