Aircraftkilleryou pass off your lack of work and enthusiasm for "we're in beta! You can't insult it because it'll get fixed!"

You are one to talk about enthusiasm....

I wonder if that news post you posted on CNCDEN is still in the archives....

You know, the one where you publically declare that you are tired of working on this crap RenAlert mod (your words, not mine) and that you will finish it when you get the time.

And in the end it took Dante to come in and finish all the work, invent all the new things to make it an expansion and even beat you (metaphorically speaking) into shape to start working again.....

Ah.... Poor Jonny boy....
