Gen_Blacky wrote on Wed, 25 February 2009 17:36make a hud.ini in your data folder then change these settings

Quote:There is new code that lets you change the color used for the teams (i.e. red for nod and yellow for gdi)

You can also change the public and private message colors.

Note that the hud.ini file is parsed on the server too (for the colored message send commands and the get color engine calls).

This requires bhs.dll on the client.

You create a hud.ini file that looks something like this

[General]

NodHouseRed=255

NodHouseGreen=0

NodHouseBlue=0

GDIHouseRed=255

GDIHouseGreen=204

GDIHouseBlue=0

PrivateMessageRed=0

PrivateMessageGreen=0

PrivateMessageBlue=255

PublicMessageRed=255

PublicMessageGreen=255

PublicMessageBlue=255

hes right
