Whatever it is, I be uploading this to Game-Maps.NET sometime today/weekend.

#1 A library of all the weapons in the gmax state. First person , 3rd person , back models. Some of them have the power up models but didn't see why I would need to change them.

#2 All the 3rd person models with the higher detail first person models.

The flamer is the only one that has all the hand animations , gun animations in there gmax state.
