for an unknown reason Instead of doing the arty like i planned i wound up doing the Transport instead, GOD i wish this had duel miniguns like it was supposed to have.

anyway, keeping in the same style as the light tank, here she is,

Short video here too,

this skin unlike many if not all the other vehicle skins in the renegade file, is 256 x 256, instead of 512 x 512, so the quality isnt as clear, but still i love it.

The skin comes in two halves, the body skin and the rotor skin, i made the rotor from scratch, but also anything that uses a rotor will have this skin, so both trans and apache (commanche single player mode) try it with and if you dont like it remove it.

Files:

v_nod_trnspt.dds - Main body skin
v_blurblade.dds - Rotor skin
